Household Waste Recycling Sites - update

Household Waste Recycling Sites (HWRSs) across West Sussex will begin reopening from Monday 11th May for limited materials.

If you are thinking of taking a trip to one of the HWRSs there are several things you need to consider.

Before planning your journey you should:

- Consider whether your journey is essential. You should only visit an HWRSs if your waste presents a risk of injury or harm to health and cannot be put out with your regular kerbside collection. If it doesn't please safely store your items at home for now.
- Check our opening hours. Sites will be running their usual summer opening days and hours. Not all sites are open every day, so please make sure to check before making a journey - visit [West Sussex Recycles](#) for more information.

Before visiting a site please note:

- Only garden waste and general household waste will be accepted. Garden waste means green waste such as grass cuttings and hedge trimmings. General household waste (or “black bag” waste) is the types of items that are collected in your kerbside collection such as food or non-recyclable packaging, and does not include electrical items, textiles, bulky items, furniture or general recycling. General household waste items brought to the sites at this time will be sent to landfill. We hope to be able to accept other items soon.
- Please continue to use your household collections for recycling and general waste where possible, and only visit the site if the journey is essential.
- Only cars will be allowed on site. Trailers and large vehicles such as vans and pickups will not be allowed access at this time.
- The mobile site at Selsey and the Witterings will not be opening for the time being.

Once at the sites there will be certain measures in place for the safety of visitors and staff:

- The number of vehicles accessing the sites will be restricted. Visitors should expect long delays at sites and should delay their visit to avoid the first couple of weeks if possible.
- There will be no pedestrian access at any of the sites under the current social distancing measures
- Social distancing barriers will be in place. Visitors will be directed into enclosed bays to dispose of their waste.
- Only one person will be allowed to get out of a vehicle. Please travel to the sites alone if possible. If other people travel to the site with you, they must remain in the vehicle.
- Site staff will not be able to help unload your waste and recycling. Please do not bring anything that you cannot safely remove from your car on your own.

Household Collections

At the present time, household recycling and waste collections continue as normal across West Sussex, and we will be supporting our colleagues at the district and

borough councils to enable these to continue, but would ask residents to be sensible about their waste production.

You can also find information about recycling and waste reduction on our website; www.wastepreventionwestsussex.co.uk

Covid-19 Updates

The Government has issued advice about disposing of rubbish should you have a confirmed or suspected case of Covid-19 in your household. Used tissues and disposable cleaning cloths should be put into a rubbish bag. The bag should then be put into a second bag and tied securely. You should then wait 72 hours before putting it in your outside bin. You are able to dispose of other household waste as normal.

Please continue to check www.westsussex.gov.uk/coronavirus for details of any impact to County Council services. We would also advise you to check any information or updates given by your local district and borough council, as they operate your waste and recycling collections and will be able to advise of any disruption or changes.

Sign up for our monthly newsletter

Finally, we know that if you receive this email you are passionate about waste prevention and recycling.

If you find these emails helpful, why not share it with a friend and get them to [subscribe](#) to the West Sussex Recycles newsletter as well.

Help us spread the message and get more people on board to make West Sussex a [strong, safe and sustainable place](#) to live.

You can also like our [Facebook](#) page and follow us on [Twitter](#) to keep up to date with the latest news and tips on waste reduction and recycling.
